

DESIGN SOLUTION

TRAWLER SHIP

PROJECT

MASTER TYLER TRAWLER
BAYOU LA BATRE, AL

PRODUCT

THERMACOTE-CERAMIC COATING

INSTALLER

ENERGY CONTROL INSULATION, INC.
MOBILE, AL (251)-443-8003

Energy Control Insulation was asked by Rod Regus Ship Build to use Thermacote on the pilothouse of this trawler ship "Master Tyler" to eliminate thermal bridging/condensation, enhancing the effectiveness of the base load insulation and reducing to a minimum the loss of energy through the structure. This coating is a high performance thermal barrier, which incorporates ceramic technology to prevent the transfer of heat and cold. Thermacote repels the radiant energy of the sun and dramatically lowers temperatures.

In order to improve your structure's "sealant" quotient, reduce or eliminate thermal bridging/condensation and enhance the effectiveness of base load insulation, Contact Energy Control Insulation, Inc. today at (251) 443-8003 for complete details on how we can improve your building projects. Thermacote is the solution anywhere hot or cold presents a problem to be solved.
